# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/DE 03/02411

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-12	YES
	Claims		NO
Inventive step (IS)	Claims	1-12	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-12	YES
	Claims		NO

### 2. Citations and explanations

- Novelty (PCT Article 33(2)) and inventive step (PCT Article 33(3)) of the application.

Reference is made to the following document:

D1: WO-A-95/24820.

Claim 1:

Document D1 is considered to be the closest prior art for the subject matter of claim 1. D1 discloses "a communication system for airport signalling devices". D1 differs from the subject matter of claim 1 in that the following feature (a) is not disclosed:

(a) "... the communication between the system components is distributed over a plurality of frequency bands in a delimited frequency range."

Consequently, **claim 1 is novel (PCT Article 33(2)).**

The following problem is solved by means of feature (a):

"the susceptibility to interference is reduced and at the same time the maximum possible data throughput for the communication is substantially increased, making communication faster and more reliable".

The system of the application as per **claim 1** is **considered to be inventive (PCT Article 33(3)) for the following reason:** the solution as per claim 1 is neither disclosed nor proposed by the prior art.

2. Claims 2-12:

Claims 2-12 are dependent on claim 1 and are therefore also novel (PCT Article 33(2)) and inventive (PCT Article 33(3)).
